Provenir Publishing, United States, 2013. Paperback. Book Condition: New. 224 x 150 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Pancreatic cancer is known to be an aggressive type of malignancy, and requires in many cases surgery, radiation, and chemotherapy treatments. Because of the aggressive nature of this diagnosis, treatment of pancreatic cancer requires a multidisciplinary team of physicians and care providers, including specialists in dietary needs and nutrition. It is very common for patients with a cancer diagnosis to have many questions about nutrition and diet. In fact, this is one of the main ways that you (or your loved one) can aid yourself in the battle with cancer. The cancer can inhibit your body's ability to heal, decrease your energy, and decrease your immune system. By optimizing diet and nutrition, research has shown that outcomes of surgery, radiation, and chemotherapy are improved. This leads to improved cure rates, better cancer treatment outcomes, and greater ability for the body to heal and rebound from the effects of cancer therapy. The goal of this text is to empower patients during their fight with cancer. By studying these practical approaches to health and nutrition, you can aid your cancer treatment team in your therapies. This is not meant to be a substitute for standard modern cancer treatments, but the goal is to provide you with further tools to fight cancer and improve your ability to heal from the cancer and the cancer treatments. Of course, this tool should be used in the context of your other treatments and we recommend that each patient discuss their individual health needs and objectives with their care providers.
