Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Examples in Applied Mechanics and Elementary Theory of Structures The following papers in Applied Mechanics and Elementary Theory of Structures are designed for engineering students who have some familiarity with the general principles underlying these subjects. Confidence and facility in applying these principles can only be acquired by assiduous practice in the solution of problems, and for this purpose the student must have ready access to a large stock of miscellaneous examples. The examples contained in text-books are subject to the defect that the principle to be employed in any particular case is of necessity usually indicated by the chapter with which the problem is associated. If his knowledge is to be of any practical value, the student must sooner or later learn to be independent of such extraneous aid, and with the object of helping him towards this state of self reliance, these twenty 3 papers of examples have been compiled. A considerable number of the questions have been taken from examination papers set at the Cambridge Engineering Laboratory, and with the exception of a few more advanced problems in the last five papers the standard agrees with that of the A papers in the Engineering Tripos Examination. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast...
