Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Bulletin of the Bureau of Standards, Vol. 7: 1911 The new form of candlepower scale herein described was designed for use in the precision photometric work of the Bureau of Standards, and is the result of an attempt to combine the direct-reading feature of the ordinary commercial photometer candlepower scale with the accuracy possible in the use of the precision photometer. It is intended to be used in connection with an automatic recording device, also designed for use in the Bureau of Standards, and described in the transactions of A. I. E. E. The automatic recorder eliminates the labor and possible errors of reading and recording the great number of settings made in a series of photometric measurements, while the direct-reading scale described below eliminates the labor and possibilities of error involved in the considerable computations heretofore necessary in finding the values of the lamps in terms of the mean of a group of standards. II. The Photometric Apparatus And The Determination Of Candlepower 1. The Precision Photometer And Method Of Measurement The precision work of the bureau in the photometry of electric incandescent lamps is done on a standard photometer of the Reichsanstalt pattern, supplied with a Lummer-Brodhun contrast screen, and the measurements are made by the substitution method; that is, the standards and the lamps to be compared with them are placed, in turn, in the socket near the left end of the bar, or test side, and are balanced against a comparison lamp placed near the right end, or comparison side. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a...
