At the level of intuition, many of us sense that modernity has stumbled, that we have fallen far short of the ethical mark. This is made evident in our personal shortcomings and in the structural inadequacies of our social, political, economic, religious and legal institutions. As a prescription for a lasting, positive change to this situation, THE BOOK OF TRANSFORMATION examines how behaving according to a universal ethics can ensure our moral evolution as a species and as a civilization. It also presents for consideration the radical idea that our nature as both human and divine is present at the genetic level and that in the course of its life-long development, this composite nature both influences and is influenced by the ethical and institutional context in which we find ourselves. As a consequence of presenting this idea, certain questions arise. How do we make it possible for our genetic composition to achieve its full ethical potential? How do we influence our social, political, economic, religious and legal environment in a positive way and avoid being...
