HarperCollins Publishers Inc, United States, 2016. Hardback. Book Condition: New. 231 x 155 mm. Language: English . Brand New Book. In this accessible, scientifically based book, the director of the Discovery Institutes Biologic Institute offers further proof that the long-accepted view of Darwins theory of evolution has significant shortcomings, and offers valid evidence in support of the idea that life was created by design. The controversial debate over Darwinism and intelligent design continues to rage across the country, from the media to local school boards. Addressing ordinary readers rather than scientists,Undeniable deepens the discussion, revealing that careful science has overwhelmingly validated Intelligent Design. Douglas Axe argues that the intuitive belief many hold, that life was created by design and not natural selection, is scientifically valid, grounded in "common science"the lifelong process of building and refining our understanding of the world through everyday experience. We all do science at this basic level, Axe contends, and this science justifies our inference that life was designed. As a scientist and the founding director of the Biologic Institute, part of the successful Discovery Institute, Axe has performed his own research and works with scientists from various disciplines to test the plausibility of Darwins theoryand build a more satisfactory alternative. Undeniable offers the most persuasive argument to date to show how sciencefrom the common to the technicalbacks up our most basic intuition: that life was created by divine design, not by natural selection.
